Full Stack Web Developer with a background in architectural technology that is committed to continued learning. Adaptable and tenacious when creating applications. Known to work to increase cooperation in the team and attention to detail.

Technical Skills

Languages: HTML, CSS, Javascript, jQuery, Moment.js, SQL, NoSQL
Applications: VisualStudio Code, MySQL Workbench, Node.js, Git, Github, MongoDB
OS: MacOS, Windows, Unix
Programs: MS Office, iLife, Google docs, LibreOffice

Projects

Project_opus_1 | github.com/AJFree458/Project_opus_1 | ajfree458.github.io/Project_opus_1
- The project was created to find events, specifically concerts, determined by geolocation.
- Created functions to retrieve weather information, help with determining the UI of the application.
- Created using HTML, CSS, Javascript, jQuery, and Moment.js

Project_2 | github.com/AJFree458/Project-2 | project2-volunteer.herokuapp.com/
- A Node.js application to help volunteers to choose volunteer events to attend, nominally for a church
- Created html for the app, and routes. Set up the server file, and set up the deployment for the app
- Created using Sequelize, MySQL, HTML, CSS, Javascript, Node.js, and Heroku.

Opus13_MVC-Burger | github.com/AJFree458/opus13_MVC-Burger |
warm-plains-37625.herokuapp.com/
- A Node.js app to create burgers and then tell whether they have been eaten or not.
- Created the HTML and the routes for displaying it. Created the database for storing the information.
- Created using HTML, CSS, Javascript, jQuery, Node.js, MySQL, and Express.
